CLS Fact Sheet
Post-Secondary Schools

What types of programs at post-secondary schools use CLS?

CLS is used for programs and courses that provide computer skills training to teens, adults and/or seniors, including:

- Computer Literacy Courses
- Developmental Studies
- Continuing Education
- Workforce Development
- Contract Training
- Staff Development

How are CLS courses used in post-secondary schools?

CLS courses are used as curriculum materials for instructor-led classes as well as for independent study materials in an open lab environment. Internet delivery of CLS courses even allows your clients to learn from home or other remote locations.

Can CLS courses be correlated to our computer training objectives?

CLS courses have been correlated to a number of national and state technology standards. Please visit our web site at www.teknimedia.com to see details of these and other correlations currently available. If the objectives for your computer literacy course or training programs aren't included, let us know and we'll be glad to create a correlation for your review.

What do others have to say about CLS?

Hundreds of post-secondary schools, workforce development programs, adult education and literacy programs, schools, libraries and correctional facilities are using CLS to meet their computer training needs. Here's what just a few of our postsecondary school customers have to say about using CLS in their programs:

> "We use the PC100 program extensively with our basic computer literacy program and it has been a big hit! PC100 is by far the best basic CBT we have come across."

Mike Sypult
Northwest Arkansas Community College
Bentonville, Arkansas

"PC100 is used for teaching the novice or beginner PC or Macintosh student. The material covers all the basics and teaches you essential skills that you need to know to interact with computer programs…. PC100 is a hands-on learning tool that allows the student to do exercises and quizzes after completing their lessons. It is equipped with audio, has a very good pace and clear demonstrations. The mouse tutorial included is excellent and a wonderful tool for a beginning level computer user."

Nancy Horton
Adult Education Learning Center
Waubonsee Community College
Aurora, Illinois
